## The Original. Since 1949.®

### New Lincoln Hoist Tension Meters

Lincoln Hoist is pleased to introduce it's new line of lineman's tension meters. The analog mechanical design (no batteries or LCD) improves performance in harsh conditions. LCDs often fail in cold climates, can be difficult to read in bright sunlight, and suffer from the constantly changing readings. Lincoln meters solve those issues, and are much smaller than competing mechanical designs. Standard units come with installed fittings ready to hook up to hoist and wire grip.

Lincoln Hoist Model Number	Capacity	Graduation	A	B	C	WT	WT2
A-10S	2,000 lbs	50 lbs	5-1/2	5/8	13	1-7/8	3-1/4
A-20S	4,000 lbs	100 lbs	6-1/2	5/8	14	2-5/8	4-1/8
A-30S	6,000 lbs	100 lbs	10	1-1/8	17-3/4	4-3/4	8

C dimension is overall length with end fittings  
WT2 is meter weight including end fittings

A, B and C dimensions are in inches
